

# **THE GREEN BEAR ACADEMY**

*~ By Daksh Jain*

## Our Vision

We aim at providing first class financial education to common people across India. With our dedicated and expert team, we wish to contribute to the growth of Indian economy.

# Our Mission

Our ultimate mission is to create a home for every trader of India where they can learn, practice, and earn from trading- all under one roof.

# INTRODUCTION

In today's fast-paced world, everyone around lacks time. But with us, you would make the best use of your time & money.

At TGB, we introduce you to an innovative course design where you learn- how to **EARN MONEY**, **SAVE MONEY**, & most importantly, **SAVE TIME**.

We are here to strengthen these three pillars of your financial life with our expertise, experience, and passion at **THE GREEN BEAR ACADEMY**.

# WHY CHOOSE US?

- 1. Expert Instructors :** Learn from seasoned professionals with extensive experience in options trading. Our instructors provide practical insights and real-world examples to enhance your understanding.
- 2. Interactive Learning :** Experience interactive learning sessions that go beyond theory. Engage in discussions, ask questions, and participate in practical exercises to reinforce your knowledge.
- 3. Real-Time Market Insights :** Stay updated with real-time market insights and trends. Understand how global events impact options pricing and learn to make informed decisions in response to market dynamics.
- 4. Career Advancement :** Whether you're a self-directed investor or looking to enhance your career in finance, mastering option strategies can open up new opportunities. Our course is designed to empower you with the skills needed for success.

Enrol now to embark on a transformative journey into the world of option trading. Gain the confidence to navigate diverse market conditions and make strategic decisions that drive your success as a trader.

# OUR OFFERINGS

# A COMPREHENSIVE 2-MONTH JOURNEY INTO TRADING MASTERY

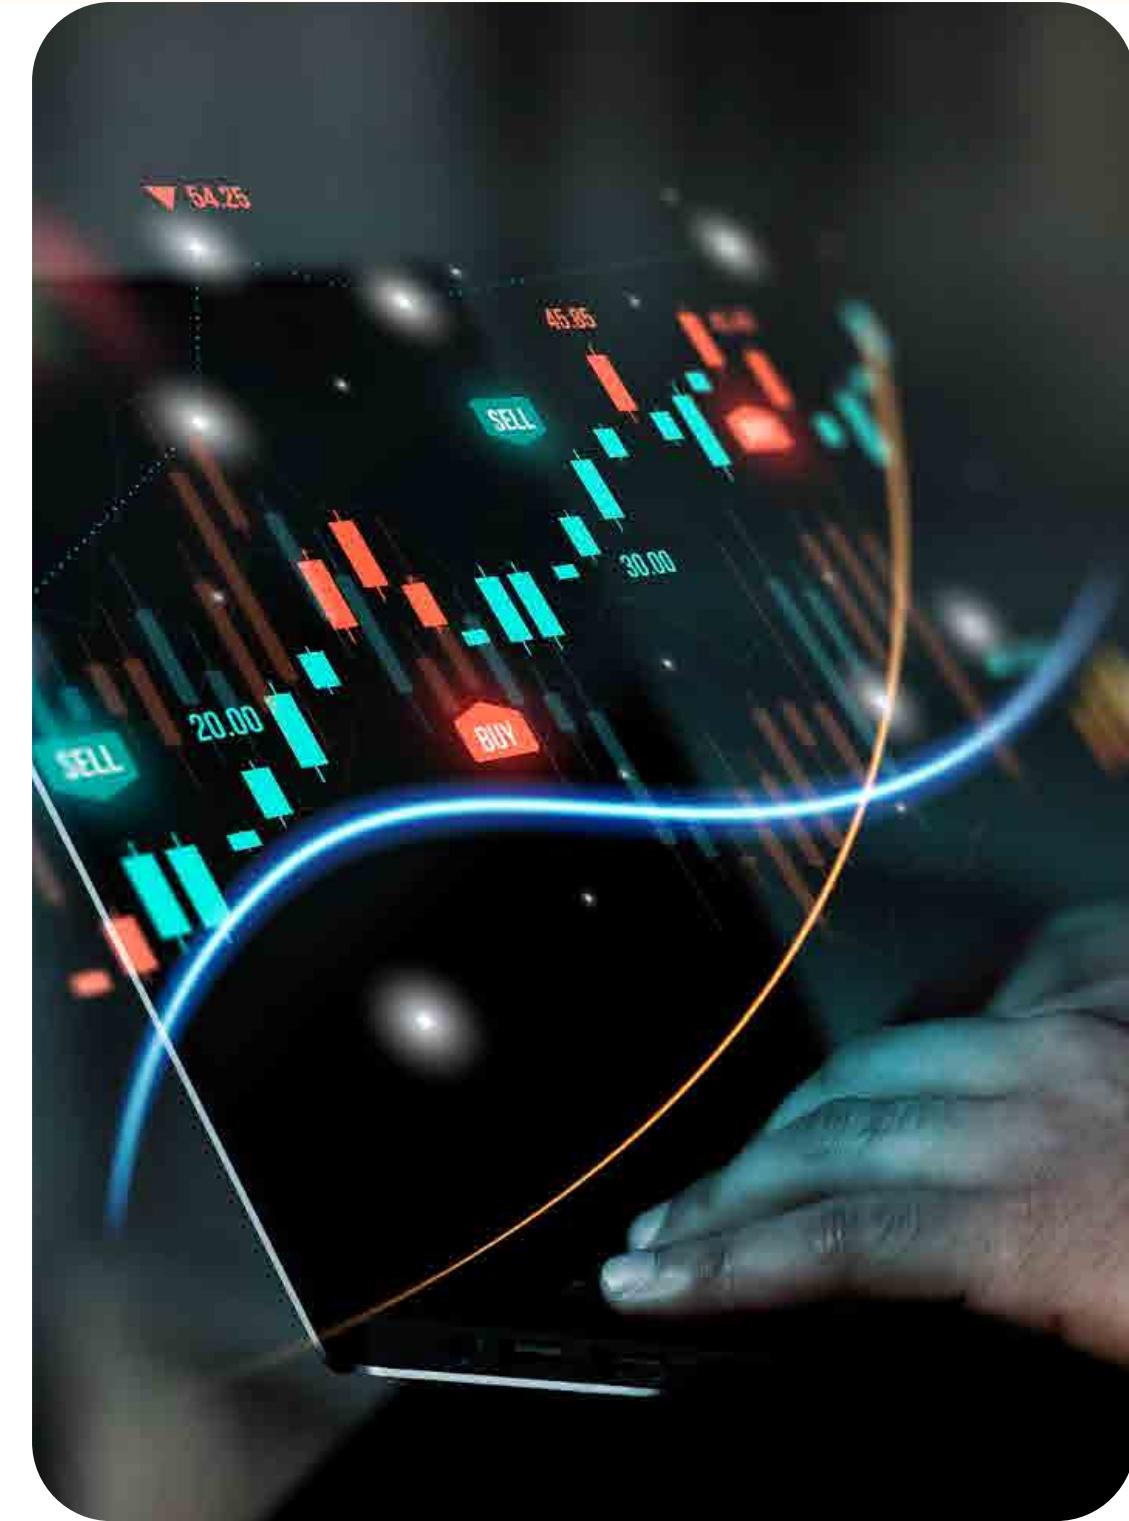

Take part in a life-changing educational journey that covers all the fundamentals of trading, from basic principles to sophisticated strategies. The goal of this in-depth, two-month course is to give you the knowledge and abilities you need to successfully navigate the ever-changing financial markets.

Grasp the core principles of market behaviour, from economic influences to chart patterns and indicators. Analyze data with precision and uncover hidden opportunities.

ONLY

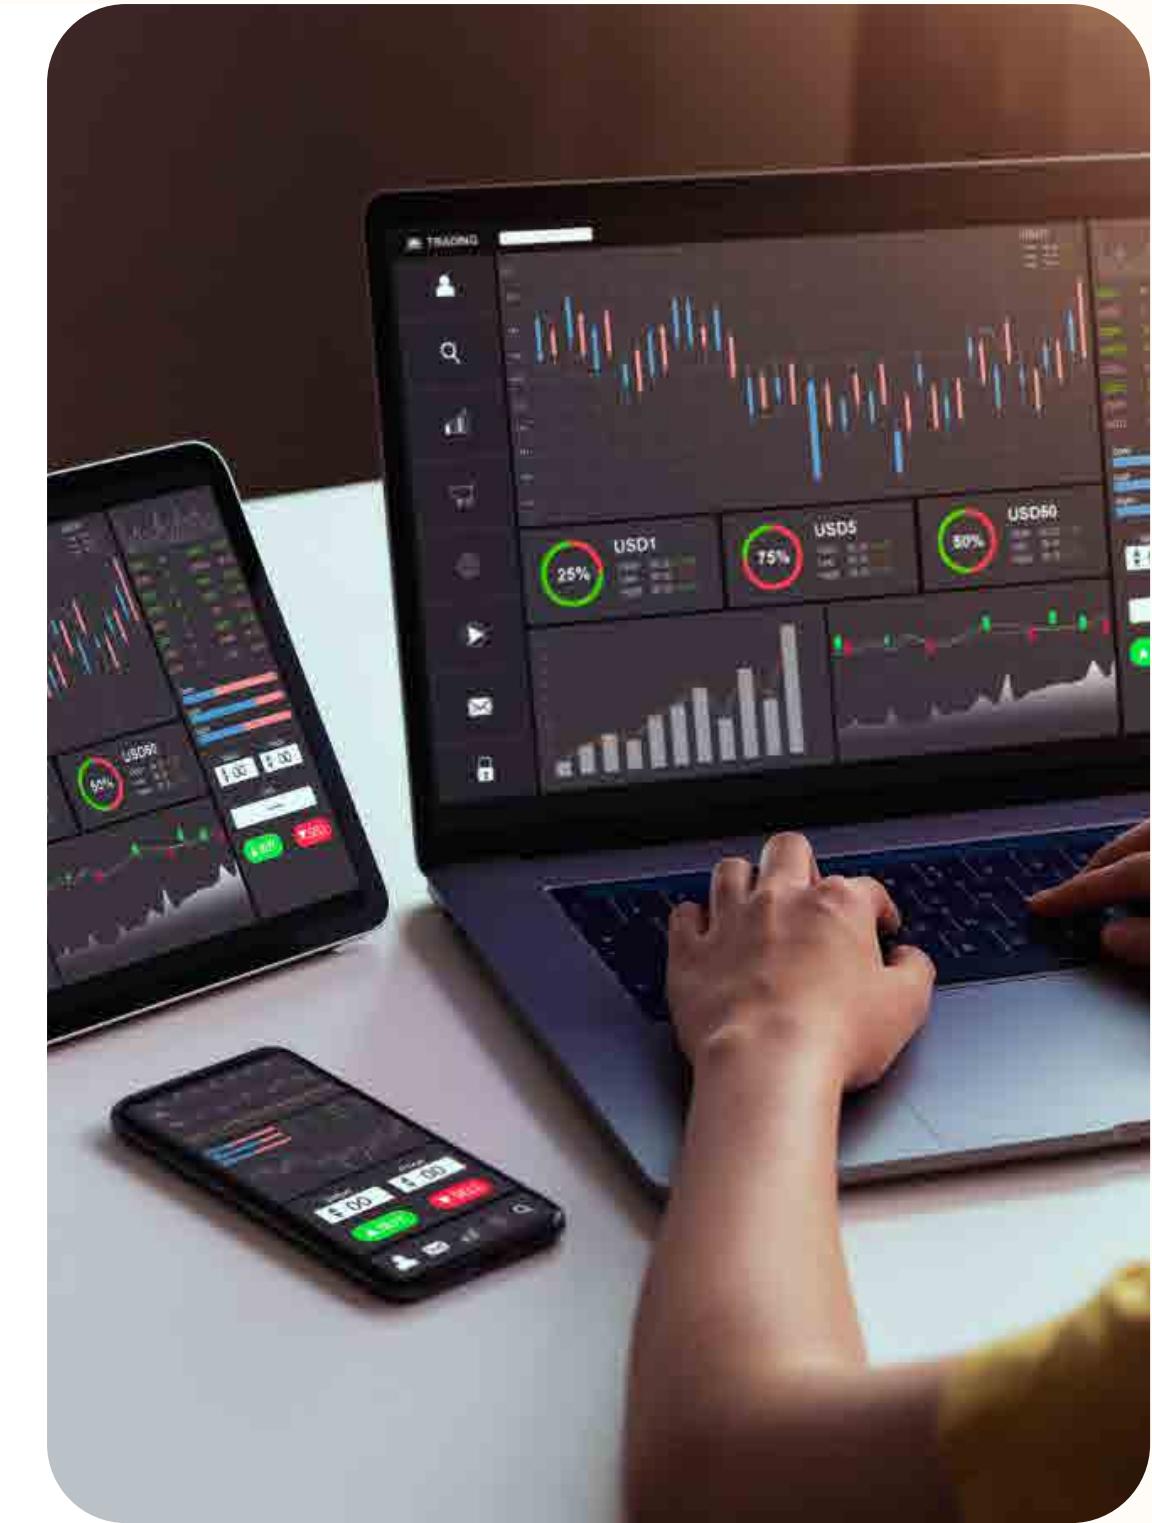

FEES : 19,999/-

- 1. BASICS OF TRADING :** Gain a solid understanding of the fundamentals of trading, including market dynamics, order types, and risk management.
- 2. TECHNICAL ANALYSIS :** Delve into the world of technical analysis, where you'll learn how to interpret price charts, identify trends, and make informed trading decisions.
- 3. CHART PATTERNS AND INDICATORS :** Explore various chart patterns and technical indicators that can be used to analyze market trends and predict potential price movements.
- 4. OPTIONS AND FUTURES :** Get acquainted with the concepts of options and futures trading, understanding how these derivative instruments can be used for risk management and speculation.

# OPTIONS EXPERT COURSE

Delve into the world of options trading with a comprehensive exploration of both option buying and selling strategies. Understand the nuances of each technique and learn how to leverage options for maximum gains.

ONLY

FEES : 14,999/-

**1. 20–25 OPTIONS STRATEGIES:** Gain expertise in a diverse range of option strategies. From basic strategies to advanced combinations, you'll learn how to use options for speculation, income generation, and risk management. Our course covers popular strategies such as covered calls, straddles, strangles, iron condors, and more.

**2. LIVE MARKET PRACTICE:** Theory is essential, but practical application is where true mastery is achieved. Engage in live market practice for each of the 20–25 option strategies covered in the course. This hands-on experience ensures that you can confidently implement these strategies in real-world scenarios.

**3. ADAPTABLE TO MARKET NATURE:** Markets are dynamic and can be bullish, bearish, or sideways. This course is designed to teach you how to navigate and thrive in all market conditions. Develop the ability to apply option strategies effectively, regardless of the prevailing market nature.

# **OUR TRADITIONAL 7 DAYS STOCK MARKET COURSE**

We are offering 7 days of totally dedicated stock market training, trading, and practicing. We are the first ones to offer a full course in minimal time so you can start trading and earning as soon as possible. We will be running only 1 batch at a time with a limited batch size so that we can give you our full focus and learning can be more fun. Unlike traditional classes where you are taught theory first which you get to practice later on, we focus directly on the implementation of the theory you need the most. Training of the batch will be held every week during market hours, i.e. 9AM to 3:30PM. Every hour of the market has its own significance that we will teach you which you can put to practice accordingly, during that time period.

ONLY

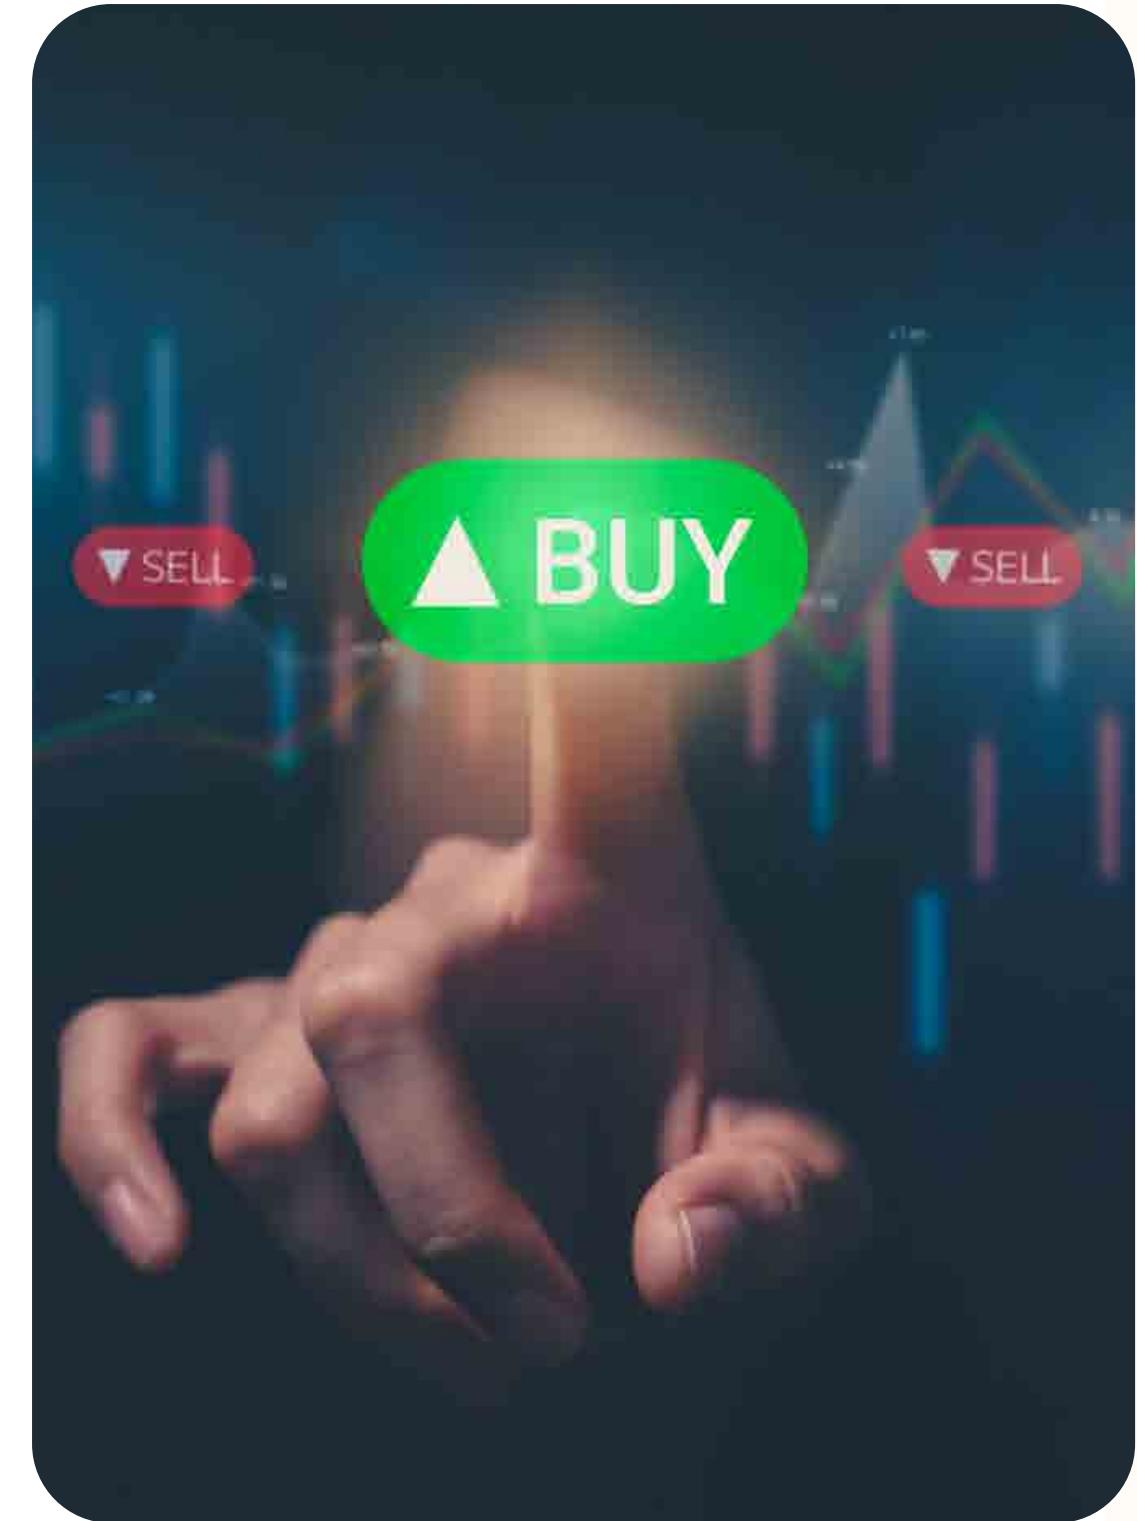

**FEES : 15,999/-**

**COMING SOON**

# **MASTER TECHNICAL ANALYST COURSE**

**Expand your trading universe beyond stocks.**

**Demystify the world of options and futures,  
and unlock unique strategies for risk  
management and profit maximization.**

- 1. GANN THEORY:** Unlock the secrets of the Gann theory, a powerful tool rooted in ancient mathematics, astrology, and natural geometry. Discover how to leverage this theory to make market predictions with up to 90% accuracy. Master the application of Gann's strategies and understand the nuances that determine their success.
- 2. HARMONIC PATTERNS:** Dive deep into the world of harmonic patterns, a sophisticated trading strategy based on Fibonacci numbers. Explore patterns such as the Crab, Shark, Gartley, ABCD, Butterfly, Bat, and Cypher. Learn how to identify these patterns on charts and use them to predict potential price changes or trend reversals.
- 3. ELLIOTT WAVE THEORY:** Uncover the principles of the Elliott Wave Theory, which posits that stock price movements follow predictable wave-like patterns influenced by investor sentiment. Understand the repetitive, rhythmic, and timely nature of market movements and how to apply this theory to make informed trading decisions.

**MR. PRATEEK JAIN**

# FOUNDER

A computer science engineer turned profitable trader —this is my story. In my 2nd year of engineering, I realized I had bigger dreams, to learn, to earn, to trade, to invest, and to teach. I started learning online about the nitty-gritty of the financial industry and trading while finishing my degree. When the lockdown was lifted, I started offline classes to learn more and trade better.

I have always been a quick learner, and with dedication and hard work, I am now a profitable trader! After all this knowledge and experience, I decided to share my knowledge with my students so that they can also find success in the world of finance.
